Meeting_6 Summary (04-Apr-2025)

- **Mode:** In-Person

Discussion Summary

1. **Progress Update**
   - Completed all planned features and functionalities for the project.
   - Developed a **dedicated Wishlist Page** where users can:
     - Add books to a personal shelf.
     - Add comments and reviews.
     - Update book reading status (e.g., Want to Read, Currently Reading, Read).
     - Search and filter books within their wishlist.
   - Implemented **full search functionality**:
     - Users can now search books by ISBN, title, author name, or keywords.
     - Filters for genre, rating, and publication year were applied for refined results.
   - Updated the **Login** and **Registration** pages for better usability and design.
2. **Discussion on Artefact Demonstration Rubric**
   - Discussed the marking rubric and expectations for the upcoming artefact demonstration.
   - Suggestions:
     - **Create fake users** with diverse interests.
     - **Populate wishlists** with books from different categories.
     - Use this data to **evaluate the recommendation system's performance** effectively.
3. **Project Artefact Management**
   - Continued maintaining up-to-date GitHub commits and Trello board task tracking.

Next Steps

- Create **fake users** and simulate real-world usage by adding varied books to their wishlists.
- Perform **evaluation** of the recommendation system based on user preferences.

- Prepare thoroughly for the **Artefact Demonstration**, focusing on showcasing key features and system evaluation outcomes.
