Meeting_5 Summary (17-Mar-2025)

- **Mode:** In-person

Discussion Summary

1. **Progress Update**
   - Updated the front-end design for a cleaner and more user-friendly experience.
   - Added a general Home Page accessible to all users.
   - Created a dedicated Dashboard for logged-in users to view their activities and personalized content.
   - Implemented the **wishlist feature**, enabling users to save books of interest.
   - Developed a **personalized recommendation system** based on users' wishlist and interaction data.
2. **Feedback**
   - Received positive feedback highlighting the professional appearance of the new front-end design and the clear navigation between the Home Page and Dashboard.
3. **Project Artefact Management**
   - Continued updating the GitHub repository and Trello board to reflect the new features and progress.

Next Steps

- Complete the **search functionalities** for better book discovery.
- Replace placeholder categories with **actual book categories**.
- Plan and design an **evaluation strategy** to assess the effectiveness of the personalized recommendation system.
