Meeting_4 Summary (27-Feb-2025)

- **Mode:** Online

Discussion Summary

1. **Progress Update**
   - Implemented a dedicated book details page allowing users to view detailed information about each book.
   - Completed user registration and login functionality to support user authentication and personalized experience.
   - Added an interactions route that logs user actions, such as when a user clicks to view book details, helping to build user behavior data.
2. **Feedback**
   - Positive feedback was received regarding the clear structure, logical progress, and well-organized implementation so far.

Next Steps

- Implement the **wishlist feature**, allowing users to save books they are interested in.
- Use wishlist data as part of the personalized recommendation system.
- Begin planning a basic model for personalized recommendations based on user interactions and wishlist data.
